USE CASE DESCRIPTION

System Requirements Specification

1 PROJECT ABSTRACT

You are tasked with formatting and parsing date and time values using `DateTimeFormatter` and working with different formats.

2 ASSESSMENT TASKS

Task 1: Date Formatting:

→ Format the current date and time into a specific format using `DateTimeFormatter`.

→ Example: Format the current date as `dd/MM/yyyy` and time as `HH:mm:ss`.

Task 2: Parse Date Strings:

→ Parse a date string in a given format into a `LocalDateTime` object.

→ Example: Parse the string `2025-01-02 12:30 PM` into a `LocalDateTime`.

Task 3: Time Zone Formatting:

→ Format a date and time with respect to a specific time zone.

→ Example: Format a `ZonedDateTime` object to `yyyy-MM-dd HH:mm:ss Z` with a time zone.

3 TEMPLATE CODE STRUCTURE

3.1 PACKAGE: COM.YAKSHA.ASSIGNMENT.DATE TIME FORMATTING AND PARSING ASSIGNMENT

Resources

Class/Interface	Description	Status
DateTimeFormattingAndParsingAssignment (class)	<ul style="list-style-type: none">Main class demonstrating date and time formatting and parsing using <code>java.time.format.DateFormatter</code>. Includes examples of formatting dates, parsing date strings, and formatting dates for specific time zones.	Need to be implemented.

4 EXECUTION STEPS TO FOLLOW

1. All actions like build, compile, running application, running test cases will be through Command Terminal.
2. To open the command terminal the test takers, need to go to Application menu (Three horizontal lines at left top) □ Terminal □ New Terminal.
3. This editor Auto Saves the code.
4. If you want to exit(logout) and continue the coding later anytime (using Save & Exit option on Assessment Landing Page) then you need to use CTRL+Shift+B-command compulsorily on code IDE. This will push or save the updated contents in the internal git/repository. Else the code will not be available in the next login.
5. These are time bound assessments the timer would stop if you logout and while logging in back using the same credentials the timer would resume from the same time it was stopped from the previous logout.
6. To run your project use command:
mvn compile exec:java
-Dexec.mainClass="com.yaksha.assignment.DateTimeFormattingAndParsingAssignment"

7. To test your project test cases, use the command
mvn test
8. You need to use CTRL+Shift+B - command compulsorily on code IDE, before final submission as well. This will push or save the updated contents in the internal git/repository, and will be used to evaluate the code quality.
